FOR IMMEDIATE RELEASE

North Carolina Co-Authors David Harman and Dr. Harvard Ayers featured with Dr. Michael Mann during Earth Day Event April 22

March 20, 2018 – Asheville, NC

David Harman

Award-winning co-authors David Harman and Appalachian State University Professor Emeritus **Dr. Harvard G. Ayers** will be featured speakers during an Earth Day Event in Asheville headlined by well-known climate scientist Dr. Michael Mann. The event takes place from 12:30 until 5:30 p.m. at OM Sanctuary, 87 Richmond Hill Drive on April 22. Both Harman and Harvard are climate change activists and experts as well as avid environmentalists who are sounding the alarm about the continued use of fossil fuels in their must read, highly informative novel, ***Train Wreck Earth***, that explains the **why** climate change is affecting the earth and the **how** to solve it.

Their book is set in novel format but filled with scientific information presented in a “classroom” setting and offers the latest research and legislation affecting our climate as well as viewpoints from prominent climate activists and scientists including Dr. Mann, Bill McKibben, Dr. Robert Howarth, Dr. Mark Jacobson, Jane Kleeb, Tim DeChristopher, Dr. George Woodwell, and Danna Smith, JD in an interesting, easily understandable and readable format.

Dr. Harvard G. Ayers

Registration is required for the “Earth Day ~ Dare to Care!” event and is open to the community to gather with qualified professionals who are daring to care by sharing their knowledge on the science behind climate change. The afternoon will also include sustainable practices, current political climate on climate change, and the healthy actions available for the people and the planet. For more information and to register go to <https://omsanctuary.org/events/preserving-cherishing-the-earth/>.

“Until we wrote ***Train Wreck Earth***, no one had presented this complex phenomenon in terms that non-science readers could understand. We found a way to tell this story clearly, explaining the settled (proven) science in the context of a fictional setting with a compelling morality tale which will motivate the reader to pursue to the last page of the last chapter. The reader will then clearly understand why taking action *now* is urgent,” Harman said.

About the Authors:

David Harman is an unexpected mix of businessman, environmentalist and self-taught scientific journalist. Not long after he became a North Carolina CPA, he joined the Sierra Club and became active in the local Blue Ridge Group in Boone, NC. He has been sounding the alarm about climate change for many years and is co-author with Dr. Harvard Ayers and Landon Pennington of ***Arctic Gardens—Voices from an Abundant Land***, a non-fiction book that details the lives of First Nation peoples living in arctic North America and how climate change is affecting their subsistence lifestyles with differing migration patterns for caribou, different ice freezing and melting cycles, and changes in vegetation.

Dr. Harvard G. Ayers, a Professor Emeritus of Anthropology at Appalachian State University in Boone, North Carolina, is a social scientist who writes general interest books and journalistic pieces to explain contemporary environmental and social justice issues. His book credits include serving as Senior Editor of ***An Appalachian Tragedy: Air Pollution and Tree Death in the Eastern Forests of North America*** (1998) Sierra Club Books, and as co-author of ***Arctic Gardens: Voices from an Abundant Land*** (2010) Arctic Voices. These two scientifically researched volumes illustrate the intersection of modern environmental issues including air pollution and climate change with modern cultures in the Appalachian coal fields, and “climate change ground-zero” of the Arctic of Alaska and adjacent Canada, the province of Native American and First Nations peoples. Each book presents the science, both physical and social, in easily understandable and readable formats.

For more information and author interviews, please contact publicist Priscilla Goudreau-Santos at 904-371-7751 or via email at priscillagoudreausantos@gmail.com. David and Harvard welcome the opportunity to tell you more about their books, their writing process and themselves.
